**Product Name:** Disposable Regional Oximetry Sensor with Disposable Signal Processor or Pod Site(s) and Cable Pathways.

**Specifications:**

- Measured regional hemoglobin saturation value (rSO2) of the sensors was compared to
- Humidity:
- Temperature:

**Sensor Connections:**

- Sensor Connections.
- Sensor Placement.
- Skin Preparation.
- Signal Processor or Pod Site(s) and Cable Pathways.

**Contraindication:**

- Do not use as a primary monitoring device.
- Do not use in settings where it is not designed to be used.
- Do not use with any local anesthetics or vasoconstrictors.
- Do not use with any skin products that contain alcohol, triclosan, or chlorine.
- Do not use with any occlusive dressings.
- Do not use with any medical device that is not specifically designed for use with this sensor.

**Instructions for Use:**

- Ensure that the sensor is properly aligned and seated on the skin.
- Ensure that the sensor is properly secured to the skin.
- Ensure that the sensor is properly connected to the signal processor.

**Pre-Use Inspections:**

- Inspect the sensor for damage.
- Inspect the sensor for proper alignment.
- Inspect the sensor for proper connection.

**Skin Preparation:**

- Remove any hair from the site of application.
- Clean the skin with an alcohol wipe.
- Apply the sensor to the skin with gentle pressure.

**Sensor Placement:**

- Place the sensor on the skin at the desired site.
- Ensure that the sensor is properly seated on the skin.
- Ensure that the sensor is properly secured to the skin.

**Sensor Connections:**

- Connect the sensor to the signal processor.
- Ensure that the connection is secure.
- Ensure that the connection is properly labeled.

**Signal Processor or Pod Site(s) and Cable Pathways:**

- Insert the sensor connector into the signal processor.
- Ensure that the connection is secure.
- Ensure that the connection is properly labeled.
