

MaCO₂ Capnography OEM Module

Development Kit Order Form

The MaCO₂ Development Kit is specially designed for manufacturers who want to integrate CO₂ modules in their line of products. The Development Kit provides a quick and easy method of evaluating our MaCO₂ OEM boards. All that is required is this kit and a standard PC computer.

Each MaCO₂ Development Kit includes the MaCO₂ OEM module, moisture trap with replaceable filter, moisture trap holder for panel mounting, PC cable, power supply, PC evaluation software, nasal cannula for side-stream monitoring, T-connector and sample line for main-stream monitoring, and specifications.

The MaCO₂ development kits are \$895.00 per kit plus shipping. Please add \$6 shipping charges for shipments within the United States and \$40 for international shipments. All pricing is in US dollars. Pricing does not include state, federal, local or sales tax, duty or V.A.T.
