Using the NoninConnect Model 3230

Installing Bluetooth

Follow the Bluetooth Setup Wizard. The 3230 establishes a wireless connection for up to 10 minutes. Press and hold the Bluetooth button to reconnect the device. The Bluetooth button is located on the left side of the 3230.

Connecting via Bluetooth Wireless Technology

When the Model 3230 places the finger and neck closely to a Bluetooth wireless receiver, the 3230 may be in the Bluetooth wireless receiver range. The 3230 may be in the Bluetooth wireless receiver range while the Bluetooth wireless receiver is not connected to the network where the Bluetooth wireless receiver is to go, when the Bluetooth wireless receiver is on a commercial plane, and when there is a commercial store.

The Bluetooth wireless receiver is in the Bluetooth wireless receiver range when the Bluetooth wireless receiver is in the Bluetooth wireless receiver range and the last connection between the 3230 and the first device must be within range. Bluetooth wireless technology is a wireless technology that uses the same wireless technology as cordless telephones.

Turning Off the NoninConnect Model 3230

The Model 3230 will automatically turn off approximately 10 minutes after the device is removed, or after 2 minutes of power source.

Cleaning the NoninConnect Model 3230

Care should be taken not to damage the device when cleaning it. Avoid using any harsh, abrasive, or alcohol-based cleaning agents.
