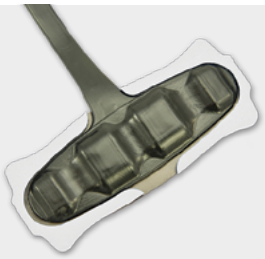
DO MORE FOR LESS.

SenSmart® 8006 Hybrid Sensor

8006CA Reusable Sensor

8006PI Disposable Patient Interface



8006 CA and PI Hybrid Sensor

For use with SenSmart X-100 Universal Oximetry System

True Innovation Improves Performance and Reduces Cost

Nonin's SenSmart® 8006 Hybrid Sensor does both. Clinically proven dual emitters and absolute rSO2 measurements improve accuracy. A reusable sensor cuts annual spend by up to 50% while reducing waste.* And a disposable patient interface helps prevent cross-contamination. Introducing SenSmart 8006, the next generation rSO2 sensor. **Innovation without compromise.**

*Based on Nonin economic value calculations

NONIN

Introducing the Next Generation rSO_2 Sensor

Advance Your Clinical and Cost Effectiveness

Innovative

Dual emitter, 16 light path rSO2 sensor reduces signal contamination for absolute accuracy

Disposable

Single-use patient interface helps prevent cross-contamination; Nonin's reliable adhesive ensures sensor stays in place

Affordable

Up to 50%* average reduction in annual sensor spend

Durable

Designed and tested to last for a minimum of 300 uses**; yields significant cost savings and reduces waste

*Based on Nonin economic value calculations
**Data on file at Nonin, sensor has 6 month warranty

Reliable Measurements Clinicians Trust

The SenSmart 8006 Hybrid Sensor works with the SenSmart Universal Oximetry System.

- Proven SenSmart rSO2 technology provides reliable and consistent measurements
- Small footprint provides room for other monitoring sensors
- Versatile design allows use on any patient > 40kg
- rSO2 and SpO2 values appear on the same screen for real-time decision making
- SenSmart system allows monitoring of up to six sites on a patient
- Indicator light on sensor confirms proper connection
